

Selway-Middle Fork Collaborative Forest Landscape Restoration Program (CFLRP)

Summary of Accomplishments Fiscal Years 2010-2017

OVERVIEW -- The purpose of the Collaborative Forest Landscape Restoration Program is to encourage the collaborative, science-based ecosystem restoration of priority forest landscapes. The Selway-Middle Fork proposal is a product of collaboration. It is based on sound science and restoration strategies developed at the forest, county, state, regional and national levels. All outputs are a product of ecological restoration activities.

PROJECT FUNDING – From fiscal years (FY) 2010-2016, the Selway-Middle Fork project has netted nearly \$24 million in appropriated CFLR funds and leveraged more than \$18.8 million in matching contributions to accomplish restoration work in the Selway-Middle Fork area.

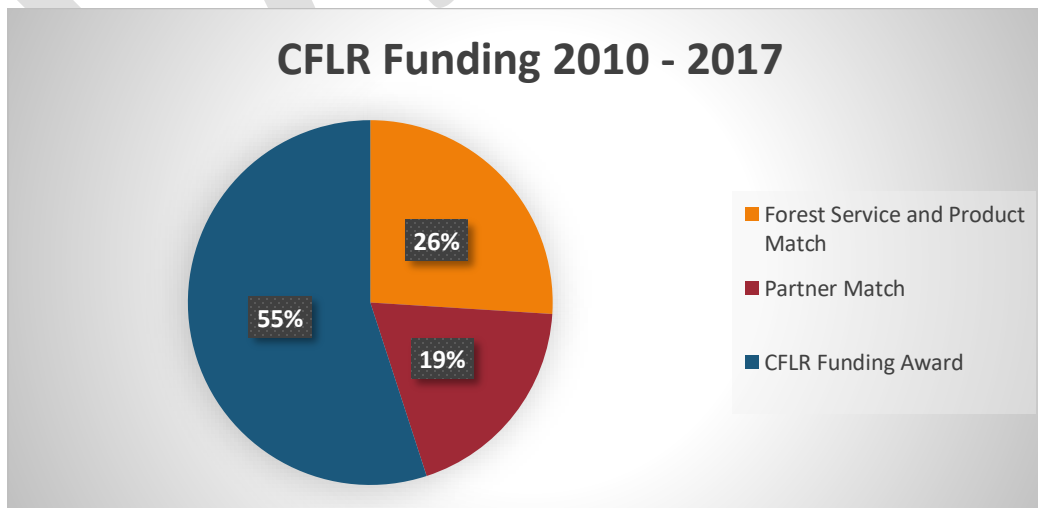

Annual CFLR Program Allocation

FISCAL YEARS	2010	2011	2012	2013	2014	2015	2016	2017	TOTAL
ANNUAL AWARD	\$1,000,000	\$3,400,000	\$4,000,000	\$3,760,000	\$4,000,000	\$4,000,000	\$3,700,000	\$3,960,000	\$27,820,000

Matching Contributions

Legislation establishing the program specified that money appropriated for CFLR projects be matched through monetary and in-kind contributions. The following table summarizes the amounts and sources of match.

	2010	2011	2012	2013	2014	2015	2016	2017	TOTALS

Wildlife Habitat Improved

Since 2010 the Selway-Middle Fork Project has treated a cumulative footprint of over 240,000 acres. Wildlife habitat has directly benefited from these treatments. The CFLR program has also yielded valuable monitoring data that will provide the scientific basis for future wildlife habitat improvement projects.
